

WFM PILLAR — WIREFRAME SPECIFICATION DOCUMENT

AI Enterprise Operations Intelligence Platform
Workforce Management Module | Version 2.0 | May 2026

Field	Detail
Classification	Internal — Product Design
Status	Draft for Stakeholder Review
Prepared by	WFM Product Team
Aligned to	BEST WFM Reference Document v24.0.0
Pitch Reference	AI Enterprise Ireland Pitch Document
Date	23 May 2026

PART 1 — FOUNDATIONAL DESIGN

1.1 Document Purpose

This document specifies the full UX/UI wireframe for the Workforce Management (WFM) pillar of the AI Enterprise Operations Intelligence Platform. It is written in direct alignment with Teleperformance's BEST WFM Reference Document v24.0.0 and the AI Enterprise Ireland Pitch Document.

The WFM pillar is one of four agent-driven pillars. Every screen, metric, and action in WFM has a defined data exchange with the Operations Agent, Finance Agent, and Recruitment Agent. Those connections are specified explicitly throughout this document.

1.2 Scope — Seven Core WFM Responsibilities

#	Responsibility	Platform Module Name
1	Forecasting	Forecast Studio
2	Capacity Planning	Capacity Planner
3	Scheduling	Schedule Builder
4	Real-Time Management (RTM)	RTM Console
5	Routing (Queues & Skills)	Routing Manager
6	Vacation Planning	Leave Planner
7	Estimating the Optimised Gross Margin	GM Estimator

Additionally the platform includes: Hourly Breakdown Engine, Erlang Calculator Suite (Erlang C and Erlang B), Cross-Department Integration Hub, Governance & Audit Layer, Reports Centre (all six BEST WFM standard reports).

1.3 Hourly Breakdown Model — The Platform Computational Spine

Every module computes against this model per BEST WFM §2.2. It is the live mathematical backbone connecting forecasting through to gross margin. The chain below is permanently visible as a collapsible sidebar panel across all modules.

1.4 Key Rates — Persistent Side Panel

Rate	Formula
Abandon Rate	Abandoned ÷ Offered Volume
Availability Rate	Available Hours ÷ Production Hours
Occupancy	Transaction Hours ÷ Production Hours
In-Office Shrinkage Rate	In-Office Shrinkage Hours ÷ Present Hours (excl. NHT)
Unplanned Out-Office Shrinkage	Unplanned Out-Office Hours ÷ Scheduled Hours Net
Planned Out-Office Shrinkage	Planned Out-Office Hours ÷ Scheduled Hours Gross
Efficiency	Transaction Hours ÷ Present Hours (excl. NHT)
Utilisation	Production Hours ÷ Present Hours (excl. NHT)

1.5 Design Principles

Principle	Description
Clarity	Clean, scannable layouts with clear visual hierarchy
Actionability	Lead with next action; surface insights not just data
Governance-first	Audit trails, explainability, and compliance built into every workflow
Human-centred	Balance automation with user control and override capability
Unified Intelligence	Cross-module insights surfaced contextually

1.6 User Roles & Permissions

Role	Modules Accessible	Can Approve
WFM Analyst	Forecast, Capacity, Scheduling, Reports	No
WFM Planning Analyst	Forecast, Capacity, Reports	No
WFM Scheduling Analyst	Scheduling, Leave Planner	No
WFM Real-Time Analyst	RTM Console, Routing, Adherence	Within RTM
WFM Team Leader / AM	All WFM modules	Yes — operational
WFM Manager	All WFM + GM Estimator + Audit	Yes — all
Operations Manager	Dashboard, Capacity (view), RTM (view)	Yes — capacity sign-off
Finance Controller	GM Estimator, Reports	Yes — GM sign-off
Recruitment Lead	Capacity (recruitment section only)	Yes — hiring plan
Training Lead	Capacity (training section only)	Yes — NHT plan
Employee (Self-Service)	My Schedule, My Leave, My Preferences	N/A

PART 2 — MODULE WIREFRAMES

MODULE 1 — WFM Dashboard

Single-pane-of-glass control centre. Surfaces the most critical metric from each of the seven WFM responsibilities and shows live cross-department status at all times.

Key Metrics Cards

Metric	Definition	Target
Requirement Coverage Rate	Capacity Production Hrs ÷ Requirement Production Hrs	100%
Scheduling Efficiency	% of intervals within ±X% of requirement threshold	≥75%
Adherence Rate	Actual present hours ÷ Scheduled hours	≥95%
Forecast Accuracy (FCA)	Actuals ÷ Forecasted volume	≥85%
Occupancy	Transaction Hrs ÷ Production Hrs	<85%
In-Office Shrinkage Rate	In-Office Shrink Hrs ÷ Present Hrs (excl. NHT)	Per budget
Annualised Attrition	Monthly attrition × 12	Per project
GM Estimate	WFM-estimated gross margin %	Per pricing

MODULE 2 — Forecast Studio

Create, version, compare, lock, and agree forecasts for all assumptions. Supports all five forecast types per BEST WFM §3.1.1. Covers: Transactions, AHT, Availability Rate, In-Office Shrinkage, Out-Office Shrinkage (planned and unplanned), and Leavers.

2.1 Forecast Types

Type	Horizon	Purpose	Binding?
Long-Term (Indicative)	4+ months	Strategic planning and initial capacity	No
Guidance (Indicative)	2–3 months	Capacity planning and initial scheduling	No
Locked (Binding)	+1 month	Contractual commitment to be achieved	Yes
Internally Agreed	+1 month	Final WFM planning basis, may differ from locked	Yes (internal)
Advisory	Current month	Trend monitoring — informative only	No

2.2 Forecast Studio Wireframe

FORECAST STUDIO
Type:[Locked ▼] Period:[Jun-Nov 2026 ▼] LOB:[All ▼] Channel:[Phone ▼]
Granularity:[Weekly ▼] View:[Table ▼][Chart ▼]

ASSUMPTIONS TABLE — LOCKED FORECAST — June to November 2026

Week	Offered Volume	Handled Volume	AHT (s)	Avail Rate	In-Off Shrink	Out-Off Shrink	Leavers (FTEs)
W23	12,500	12,125	320	31.2%	12.0%	4%/18%	2.0
W24	13,200	12,804	317	30.8%	11.8%	4%/17%	1.5
W25	14,100	13,677	315	31.5%	12.2%	4%/19%	3.0 ⚠
W26	13,800	13,386	318	31.0%	12.0%	4%/18%	1.0
W27	12,900	12,513	320	31.2%	12.5%	5%/18%	2.0
W28	12,100	11,737	322	30.9%	12.0%	4%/17%	1.5

⚠ W25 Leavers 3.0 FTE above trend. Verify with Operations.
[Edit Row] [Add Event] [Lock Week] [Export CSV] [Send to Cap Plan]

2.3 Version Comparison Panel

FORECAST VERSION COMPARISON — Offered Volume

Version	W23	W24	W25	W26
Client Locked Forecast	12,500	13,200	14,100	13,800
Previous Internal Forecast	12,200	12,950	13,800	13,500
Current Internal Forecast	12,125	12,804	13,677	13,386
Actuals	12,048	12,711	—	—
FCA (Client)	90.4%	87.3%	—	—
FCA (Internal)	96.2%	96.2%	—	—

AI: Client forecast running +3.8% above actuals consistently.
Recommend internally agreed forecast at -4% vs client locked for W26+.
[Accept AI Recommendation] [Set Custom Adjustment] [Keep Client Volume]

2.4 AHT Learning Curve Manager

Per BEST WFM §3.1.3 — AHT must be weighted by CE seniority distribution.

Prod Week	W1	W2	W3	W4	W5	W6	W7	W8	W9	W10	W12+
AHT (s)	1200	1020	867	737	626	595	559	509	475	459	450

Group	FTEs	Prod Week	AHT (s)	Weighted Hrs	Contribution
Group 1 (Tenured)	6.0	W5	626	3,756	40.2%
Group 2 (Senior)	4.0	W12+	450	1,800	19.3%
New Hires A	2.0	W1	1,200	2,400	25.7%
New Hires B	2.0	W2	1,020	2,040	21.8%
TOTAL / Wtd Avg	14.0	—	571	9,996	100.0%

2.5 Event Impact Register

Per BEST WFM §3.1.3 — all events affecting volume must be quantified and stored.

Event	Type	Start	End	Impact %	Applied To
Summer Bank Holiday	Holiday	04-Aug	04-Aug	–35%	W32
Product Launch	Client	12-Jun	18-Jun	+22%	W24
Payment Cycle Peak	Recurring	20th/mth	22nd/mth	+18%	Monthly
Black Friday	Seasonal	27-Nov	01-Dec	+45%	W48

2.6 Forecast Rolling Period Status

Finance Milestone	Due	Status
Yearly Budget (Sep/Oct)	Oct 2025	✓ Submitted
Q1 Re-forecast (Dec)	Dec 2025	✓ Completed
Q2 Re-forecast (Mar)	Mar 2026	✓ Completed
Q3 Re-forecast (Jun)	30-Jun-2026	○ Due — Open
Q4 Re-forecast (Sep)	Sep 2026	○ Upcoming

2.7 Cross-Department Data Flows — Forecast Studio

Direction	Department	Data Sent / Received	Trigger / Frequency
► TO	Capacity Planner	Locked volume, AHT, shrinkage assumptions per week	On forecast lock
► TO	Finance Agent	Quarterly re-forecast volumes; yearly budget assumptions	Quarterly / Annual
◄ FROM	Operations Agent	Actual AHT by interval; actual volume by queue; client calendar events	Live feed
◄ FROM	Recruitment Agent	Confirmed new hire start dates for AHT learning curve	As confirmed

MODULE 3 — Capacity Planner

Build and maintain a rolling 6-month capacity plan at weekly granularity. Achieve 100% requirement coverage rate on production hours level. Optimise company resources. Sign off with all stakeholders. Per BEST WFM §3.2.

3.1 Requirement Build Engine

Requirement Build Engine – W25 (16-20 Jun 2026)			
Step	Item	Formula	Result
A	Internally Agreed Forecast (Offrd)	From Forecast	13,677
	× Contractual Threshold	× 1.00	13,677
B	Volume to Handle	× (1-ABA 3.1%)	13,243
C	Transaction Hours	× AHT 315s÷3600	1,159 hrs
D	Production Hours	÷ (1-Avail 31.5%)	1,692 hrs
E	Present Hours (excl. NHT)	÷ (1-InOff 12.2%)	1,927 hrs
F	Scheduled Hours Net	÷ (1-UnpOff 19.0%)	2,379 hrs
G	Scheduled Hours Gross	÷ (1-PlnOff 4.0%)	2,478 hrs
FTE Requirement (Gross)		÷ 40 hrs/wk	62.0 FTEs
[Edit Any Assumption] [Recalculate] [Compare vs Pricing]			

3.2 Capacity Build Engine

Capacity Build Engine – W25			
Step	Item	Formula	Result
A	Scheduled Hours Gross (Capacity)	126 FTE × 40hrs	5,040 hrs
B	Scheduled Hours Net	× (1-PlnOff 4.0%)	4,838 hrs
C	Present Hours (excl. NHT)	× (1-UnpOff 19.0%)	3,919 hrs
D	Production Hours (Capacity)	× (1-InOff 12.2%)	3,441 hrs
E	Transaction Hours (Capacity)	× (1-Avail 31.5%)	2,357 hrs
F	Volume to Handle (Capacity)	÷ AHT 315s÷3600	26,938 calls
G	Volume Offered (Capacity)	÷ (1-ABA 3.1%)	27,799 calls
Current FTE: 126 Leavers W25: -5 New Hires: +3 Transfers: +2 Net FTE W25: 126			
Requirement Coverage Rate (Production Hours): Cap Production Hrs ÷ Req Production Hrs = 3,441 ÷ 1,692 → see LOB split [View Per LOB] [View Per Skill] [View Per Site]			

3.3 Six-Month Rolling Coverage Dashboard

Week	REQ Prod Hrs	CAP Prod Hrs	Coverage Rate	Status
W23	1,692	1,658	98%	✓ OK
W24	1,810	1,846	102%	✓ OK
W25	1,927	1,814	94%	⚠ Below target
W26	1,874	1,756	94%	⚠ Below target
W27	1,751	1,614	92%	⚠ Below target
W28	1,640	1,558	95%	⚠ Below target
W29	1,580	1,622	103%	✓ OK
W30	1,612	1,680	104%	✓ OK

NOTE: W25–W28 below 95% — AI recommends opening 6 hire requisitions by 26-May to enter production W27. [Send to Recruitment] [Simulate Alternative]

3.4 Leavers Tracker — Forecast vs Actuals vs Projection

	W21 (Past)	W22 (Past)	W23 (Current)	W24 (Locked)	W25 (Locked)	W26 (Open)
Forecast	1	2	2	3	3	2
Actuals	2	1	2	5 ⚠	—	—
Projection	2	1	2	5	5 ⚠	2

NOTE: W24 actuals: 5 confirmed leavers vs 3 forecast. Projection updated. W25 now inherits revised projection — coverage rate recalculated.

3.5 Stakeholder Sign-Off Workflow

Stakeholder	Role	Status	Action
WFM Manager	Accountable	✓ Signed 22-May 09:10	—
Operations Mgr	Accountable	✓ Signed 22-May 11:32	—
Recruitment Lead	Consulted	○ Pending	Send Reminder
Training Lead	Consulted	○ Pending	Send Reminder
Account Manager	Informed	✓ Notified 22-May 14:00	—
Finance Ctrl	Informed	✓ Notified 22-May 14:00	—

3.6 Recruitment Tracker

Week	FTE Need	Hire Date	NHT Start	Nesting	Prod Entry	Pass Rate	Net FTE	Status
W27	6	W24	W24	W26	W27	85%	4.1	🟡 Open
W28	4	W25	W25	W27	W28	85%	3.4	🔴 Late
W29	3	W26	W26	W28	W29	85%	1.6	○ Draft

3.7 Company Resource Forecast

Resource	W23	W24	W25	W26	W27	W28
PCs / Headsets	126	126	128	131	134	137
Training Rooms	2	3	2	2	3	2
Office Seats	82	82	84	86	88	90

3.8 Cross-Department Connections — Capacity Planner

Direction	Department	Data Sent / Received	Frequency
► TO	Recruitment Agent	Hire requisitions: FTE count, start date, skill requirements; training room bookings	On plan approval or coverage alert
► TO	Finance Agent	GM estimation per week; company resource cost projections; staffing cost estimate	Weekly after sign-off
► TO	Operations Agent	Production hours capacity per week and LOB; CE deployment per skill group	Weekly
◄ FROM	Forecast Studio	Locked volume, AHT, shrinkage assumptions per week	On forecast lock (auto)
◄ FROM	Operations Agent	Actual FTE movements; confirmed leavers per week	Weekly / as confirmed

MODULE 4 — Schedule Builder

Create optimised schedules at interval level (15–30 min granularity). Maximise interval coverage, employee convenience, legal compliance, and operational efficiency. Per BEST WFM §3.3.

4.1 Interval Coverage Table — Primary Scheduling Workspace

SCHEDULE BUILDER — W23 Mon 23 Jun 2026 LOB: Customer Care

UNDER %					−2.1%		
[Generate Schedules] [Optimise] [Publish] [Lock] [Export]							

4.2 Interval-Level Compliance Measurement

Per BEST WFM §3.3.4 — Scheduling Efficiency is measured as the percentage of intervals within the acceptable threshold. Threshold: 85% minimum to 115% maximum.

Interval	Coverage Rate	Within 85%–115%?
08:00	91.1%	✓ Yes
08:30	92.0%	✓ Yes
09:00	95.4%	✓ Yes
09:30	102.8%	✓ Yes
10:00	101.3%	✓ Yes
10:30	98.8%	✓ Yes
11:00	97.5%	✓ Yes
11:30	97.5%	✓ Yes
12:00	113.3%	✓ Yes
12:30	117.3%	✗ No — Over 115%
13:00	125.0%	✗ No — Over 115%
13:30	125.0%	✗ No — Over 115%
14:00	110.0%	✓ Yes
14:30	102.5%	✓ Yes
15:00	100.0%	✓ Yes
15:30	100.0%	✓ Yes
16:00	102.7%	✓ Yes
16:30	94.3%	✓ Yes
17:00	91.7%	✓ Yes
17:30	88.0%	✓ Yes
18:00	100.0%	✓ Yes
18:30	103.3%	✓ Yes
RESULT	19 of 22 intervals within threshold	Efficiency = 86.4% ✓ (Target ≥75%)

4.3 Weekly Scheduling Metrics Summary

Metric	Result	Target	Status
Scheduling Efficiency (daily avg)	87.2%	≥75%	✓
Over-scheduling %	+5.3%	Minimise	⚠
Under-scheduling %	−2.1%	Minimise	✓
Preference Fulfillment Rate	83.4%	≥80%	✓
Availability Compliance Rate	100.0%	100%	✓
Legal Violations	0	0	✓
Shift Swap Approval Rate	91.2%	≥85%	✓
Weekly Schedule Change Rate	4.1%	<5%	✓
Avg Shift Variance on Consecutive Days	0.8 hrs	Minimise	✓
Supervisor Coverage ≥80% of CE time	81.3%	≥80%	✓

4.4 Scheduling Methods Supported

Method	Description	When to Use
Preference-based	Employees submit shift preferences; system optimises fit	Standard — recommended as primary method
Rotating	Shifts rotate for fairness across start times and days off	Where fairness across day segments is required
Fixed	Static schedules that do not change week to week	Overnight or highly specialised shifts
Shift Bidding	Employees bid based on performance or seniority ranking	High-performance cultures; incentive-based scheduling

NOTE: BEST WFM §3.3.2 recommends a mix of preference-based and rotating schedules.

4.5 New Hire Scheduling Sub-Module

NEW HIRE SCHEDULING — NHT Batch W24 (6 Trainees)
NHT Start: 09-Jun-2026 Duration: 3 weeks Nesting: 1 week
Production Entry: W27 (07-Jul-2026)

TRAINING SCHEDULE:						
	Mon	Tue	Wed	Thu	Fri	Rm/Trn
Batch A(3)	08-16	08-16	08-16	08-16	08-16	Rm1/T1
Batch B(3)	12-20	12-20	12-20	12-20	12-20	Rm2/T2
Training Room Utilisation: Rm1 100% Rm2 100%						
Max class size: 4 Current: 3 per batch ✓						
RULES ENFORCED:						
✓ New hires scheduled with Supervisor/Coach in same intervals						
✓ Not scheduled during peak intervals (09:00-11:00)						
✓ Non-available statuses allocated for post-call debriefs						
✓ Production distributed across day to minimise SL impact						
[View NHT Timetable] [Assign Trainer] [Send to Training Lead]						

4.6 Cross-Department Connections — Schedule Builder

Direction	Department	Data Sent / Received	Frequency
► TO	Operations Agent	Published schedules per CE per interval per skill; supervisor schedule; over/under staffing view	On publish / lock
► TO	Recruitment Agent	NHT schedule (training room, trainer, batch size); shift pattern for job adverts	Per NHT batch
► TO	Finance Agent	Scheduled hours gross per week; premium shift hours (evenings, weekends) for cost model	On schedule lock
◄ FROM	Operations Agent	Actual login/logout times for adherence feed; CE skill certification updates	Live ACD feed

MODULE 5 — RTM Console

Live, proactive management of operations by the interval. Monitor KPIs, manage adherence, take actions, log the action tracker, manage outages, and communicate across the CE–Supervisor–WFM chain. Per BEST WFM §3.4.

[Request OT] [Approve VTO] [Reassign Skill] [Log Outage]

5.2 RTM Action Matrix — Fully Operationalised

Per BEST WFM §3.4.2 — the action matrix defines what to do at each threshold. Example indicator: Service Level. Contractual target: 80% daily.

Status	Condition	Actions	Communication Flow
WHITE (Over-delivery)	>85% in 2 consecutive intervals	1. Initiate VTO collection 2. Request increase in non-production activities (coaching, meetings)	RTA → Supervisor → CE
GREEN (On-target)	80%–85%	1. Monitor closely 2. Log in action tracker 3. Refuse additional shrinkage requests	RTA monitors
AMBER (Under-delivery)	75%–80% in 2 consecutive intervals	1. Prioritise lower-SL queues 2. Dedicate multiskill CEs to queue 3. Refuse new shrinkage 4. Alert Supervisor on duty	RTA → Supervisor → CE OM informed
RED (Critical)	<75% in 1 interval	1. Cancel all non-essential shrinkage 2. Redistribute breaks immediately 3. Collect OT 4. Change skill priorities in ACD 5. Escalate to OM + Client	RTA → CE directly (Sup informed) RTA → Supervisor → CE OM → Client if contractual

5.3 RTM Action Tracker

Time	Channel	LOB	Action Taken	Result	Effective?
09:15	Phone	Billing	Postponed Team A Meeting	SL +3%	✓ Yes
09:45	Phone	Billing	2 OT requests sent	Pending	○ Monitor
10:22	Phone	Care	Chat → Phone skill swap (x3)	SL +1%	✓ Yes
10:35	Phone	Care	Break postponed (x3)	SL +2%	✓ Yes
10:47	Phone	Care	Meeting postponed	Pending	○ Monitor

5.4 Communication Scheme

Situation	Communication Flow
CE on wrong status	RTA → CE directly [Supervisor informed]
CE extended break >5 min	RTA → Supervisor → CE
CE absent / no show	RTA → Supervisor → CE (call attempt)
Long ACW detected	RTA → Supervisor → CE
VTO / OT request	RTA → Supervisor → CE
Skill change needed	RTA → CE [Supervisor informed]
Queue reassignment	RTA → CE [Supervisor informed]
CE system outage (individual)	CE → RTA [Supervisor informed]
Global outage	RTA → all CEs [Supervisor informed]
Supervisor requests shrinkage slot	Supervisor → RTA (approval required)

5.5 Outage Tracker

ID	Start	End	Type	Source	CEs Affected	Hours Lost	KPI Impact
OT-41	08:22	08:51	Client System	Client	12	5.8	SL -4.2% ABA +1.8%
OT-42	10:05	10:12	Network	TP	8	0.9	SL -0.8%

5.6 Cross-Department Connections — RTM Console

Direction	Department	Data Sent / Received	Frequency
► TO	Operations Agent	Live SL, AHT, queue depth, adherence every 30s; EOD RTM report; outage notifications with CE list and revenue impact	Real-time / Daily
► TO	Finance Agent	Outage hours lost for billing deductions; OT hours collected for payroll; VTO hours approved for revenue impact tracking	Daily
◄ FROM	Operations Agent	Real-time ACD data: calls in queue, ASA, ABA, agent states; client escalations requiring RTM response	Every 15–30 seconds
◄ FROM	Schedule Builder	Published schedule per CE per interval (basis for adherence); planned shrinkage schedule (meetings, training, breaks)	On schedule publish

MODULE 6 — Routing Manager

Configure and monitor queue groups and skill assignments. Optimise availability rate through multi-skilling. Prevent abandoned transactions due to orphan queues. Per BEST WFM §3.5.

6.1 Queue × Skill Matrix

ROUTING MANAGER – Queue × Skill Matrix

Queue	Sk-1 Phone	Sk-2 Chat	Sk-3 Bill	Sk-4 TechL1	Sk-5 TechL2	Sk-6 Sales	Abandon Rate
Q-General Care	P1	P2	--	--	--	--	3.1% OK
Q-Billing	P1	--	P1	--	--	--	2.8% OK
Q-Tech Support	P1	--	--	P1	P2	--	4.2% OK
Q-Sales	P1	P2	--	--	--	P1	1.9% OK
Q-Escalations	P1	--	P2	P2	P1	--	0.8% OK
Q-Email Backlog	--	--	P1	P1	--	--	N/A

P1=Primary P2=Backup --=Not assigned

⚠ Q-Email Backlog has no Phone skill – deferred only. Correct?

[Confirm] [Add Phone as P2]

Availability Rate Impact of Current Multi-Skilling:

Target: ≤32% | Current: 31.2% OK

Without multi-skilling simulation: 38.4% (would breach SL target)

[Edit Matrix] [Simulate Skill Change] [Apply to ACD] [Audit Log]

6.2 Routing Strategy Configuration

Strategy	Rule	Status
Customer Value-Based	Platinum-tier customers routed to Q-Escalations (TechL2)	✓ Active
Language-Based	French-language callers routed to Agent group FR-1 (priority)	✓ Active
Time-Based Callback	If ASA >120s during 12:00–14:00 offer scheduled callback in 15:00–17:00 window	✓ Active
Issue Severity	IVR tag "Outage" bypasses queue and routes direct to TechL2	✓ Active
Preferred Agent	Returning customers connected to same agent where available	○ Inactive

6.3 Blending vs Multi-Skilling

Type	Description	Technical Requirement
Blended CE	CE can automatically handle various transaction types without manual setting change. Example: finishes chat then auto-receives phone call.	No manual ACD change needed
Multi-Skilled CE	CE can handle various transaction types but manual adjustment of ACD settings required when switching. Example: must change tool setting to move from chat to phone.	Manual ACD skill change required

MODULE 7 — Leave Planner

Provide employees with fair, transparent, real-time vacation booking from capacity-calculated available slots. Ensure operational stability and legal compliance. Per BEST WFM §3.6.

7.1 Available Slot Calculator — Linked to Capacity Plan

LEAVE SLOT CALCULATOR — Linked to Capacity Plan

How slots are calculated (per day, per LOB):
Step 1: Take capacity plan requirement coverage rate per day
Step 2: Identify buffer above 100% coverage (safe-to-approve zone)
Step 3: Convert buffer FTEs to leave slots

Example — Monday 15 Jun 2026 (LOB: Customer Care):
Required Production FTEs: 48.0
Available Production FTEs: 52.0
Buffer FTEs: 4.0 (8.3% above requirement)
Max leave slots today: 4 (each = 1 FTE day)
Already booked: 2
Remaining slots available: 2 → shown to employees as OPEN

SLOT CALENDAR — June 2026:

	01	02	03	04	05	08	09	10	11	12	15	16	17	18	19
Slot	3	3	4	BH	BH	4	4	3	3	2	2	4	4	3	3
Bkd	3	2	4	BH	BH	1	2	3	3	2	0	2	3	2	1
Rem	0	1	0	BH	BH	3	2	0	0	0	2	2	1	1	2

BH=Bank Holiday (blocked) Slot=Total Bkd=Booked Rem=Remaining

7.2 Employee Self-Service Booking Portal

LEAVE BOOKING — Employee View: Sarah Johnson

Leave Balance:
Annual Leave: Accrued 18d | Used 5d | Planned 3d | Remaining 10d
Public Holidays: Accrued 10d | Used 4d | Planned 0d | Remaining 6d

Book Leave:
From: [15-Jun-2026] To: [19-Jun-2026] Days: 5

Availability Check:
15-Jun: 2 slots available → APPROVED instantly
16-Jun: 2 slots available → APPROVED instantly
17-Jun: 1 slot available → APPROVED instantly
18-Jun: 0 slots available → NOT AVAILABLE this date
19-Jun: 3 slots available → APPROVED instantly

⚠ 18-Jun unavailable. Adjust dates or select alternative.
[Confirm 4 days excl. 18-Jun] [Change Dates] [Cancel]
Priority Wave: Wave 2 (Seniority-based) | Opens: 01-Jun-2026

7.3 Prioritisation Model Configuration

Wave	Priority Criteria	Opens	CEs in Wave
Wave 1	Single parents / dependant carers	01-Jun	12
Wave 2	Seniority >2 years	08-Jun	28
Wave 3	Low absenteeism (<3% unplanned)	15-Jun	34
Wave 4	Remaining team members	22-Jun	46

Model	Logic
First Come First Served	Approval based on submission order
Seniority / Performance	Senior or high-performing employees prioritised
Rotational (Waves)	Employees grouped into priority waves — globally recommended by BEST WFM
Point-Based	Employees spend points; peak days cost more points

7.4 Cross-Department Connections — Leave Planner

Direction	Department	Data Sent / Received	Frequency
► TO	Capacity Planner	Approved leave bookings update planned out-office shrinkage; coverage rate recalculates instantly on each approval	On every approval (auto)
► TO	Schedule Builder	Approved leave per CE per day locked into schedule as absent	On every approval (auto)
► TO	Finance Agent	Unused leave liability (accrued days × daily CE cost); leave utilisation rate for financial provisioning	Monthly
◄ FROM	Operations Agent	Unplanned absence actuals (no-shows, sickness) for comparison vs planned leave	Daily

MODULE 8 — GM Estimator

Estimate and optimise gross margin across all WFM planning stages. Compare assumptions at pricing, commitment, re-forecast, capacity plan, schedule, and actuals. Quantify the financial impact of every WFM decision. Per BEST WFM §3.7.

8.1 Stage Comparison — Full Hourly Breakdown

Item	Pricing	Cap Plan	Schedule	Actuals	Variance
Offered Volume	12,000	12,500	12,500	12,048	—
Abandon Rate	3.0%	3.1%	3.1%	2.9%	—
Handled Volume	11,640	12,113	12,113	11,699	—
AHT (seconds)	310	320	320	324 ⚠️	+4s
Transaction Hours	1,005	1,077	1,077	1,053	-24 hrs
Availability Rate	30.0%	31.2%	31.2%	31.8%	+0.6pp
Production Hours	1,436	1,566	1,566	1,544	—
In-Office Shrinkage	12.0%	12.0%	12.0%	12.6% ⚠️	+0.6pp
Present Hours (ex NHT)	1,632	1,780	1,780	1,766	-14 hrs
Unplanned Out-Off Sh	18.0%	18.3%	18.3%	19.1% ⚠️	+0.8pp
Scheduled Hours Net	1,990	2,179	2,179	2,182	—
Planned Out-Off Shrink	4.0%	4.0%	4.0%	3.8%	—
Scheduled Hours Gross	2,073	2,270	2,270	2,269	—

8.2 GM Calculation and Stage Comparison

Item	Pricing	Cap Plan	Actuals	Variance
Billable Transaction Hours	1,005	1,077	1,053	-24 hrs ⚠️
Price per Transaction Hour	€7.30	€7.30	€7.30	—
TOTAL REVENUE	€7,337	€7,862	€7,687	-€175 ⚠️
Present Hours (ex NHT)	1,632	1,780	1,766	-14 hrs
Direct Cost / PPH	€10.39	€10.39	€10.39	—
DIRECT COSTS	€16,957	€18,495	€18,349	-€146
GROSS MARGIN (€)	€34,218	€33,847	€34,082	-€29
GROSS MARGIN (%)	34.8%	34.4%	34.6%	-0.2pp ⚠️

NOTE: Billing model: Per Transaction Hour. Price/Transaction Hr: €7.30. Direct Cost/PPH: €10.39 (updated by Finance 01-May-2026). Key variance drivers: AHT +4s vs plan → -24 billable hrs → -€175 revenue; In-office shrinkage +0.6pp → +€62 direct cost.

8.3 What-If Scenario Simulator

Item	Baseline	Scenario A (AHT -30s)	Scenario B (In-Off -1pp)	Scenario C (A + B)
AHT (seconds)	324	294	324	294
In-Office Shrinkage	12.6%	12.6%	11.6%	11.6%
Transaction Hours	1,053	1,157	1,053	1,157
Revenue	€7,687	€8,446	€7,687	€8,446
Direct Costs	€18,349	€18,349	€17,732	€17,732
GM (%) — full project	34.8%	35.6%	35.4%	36.2%
GM improvement (pp)	—	+0.8pp	+0.6pp	+1.4pp

NOTE: Scenario C yields +€1,376 GM improvement per week. Annualised: +€71,552 if sustained. Recommend presenting to OM + Finance.

8.4 Direct Cost / PPH Definition

Direct Cost Category	Cost	Cost per Present Hour	Cost % Allocation
Salaries + Taxes	€100,000	€10.64	90.09%
Bonus	€4,000	€0.43	3.60%
Recruitment Costs	€1,500	€0.16	1.35%
Benefits	€5,500	€0.59	4.95%
TOTAL	€111,000	€11.81	100.00%

8.5 Cross-Department Connections — GM Estimator

Direction	Department	Data Sent / Received	Frequency
◀ FROM	Finance Agent	Direct Cost/PPH updated monthly from actual financial results; price per unit; SG&A cost allocations; bonus/malus results; AHT cap confirmation	Monthly / On contract change
▶ TO	Finance Agent	WFM-estimated GM per week; variance analysis actual vs pricing; scenario simulations for pricing team; quarterly re-forecast GM inputs	Weekly / Quarterly
▶ TO	Operations Agent	AHT reduction targets as operational levers to improve GM; in-office shrinkage optimisation recommendations	Monthly
▶ TO	Recruitment Agent	Cost of leavers estimate per FTE (recruitment + NHT cost); optimal hire timing to minimise dual-cost overlap periods	Monthly

MODULE 9 — Erlang Calculator Suite

Built-in staffing calculators based on Erlang C and Erlang B formulas. Used for requirement estimation and trunk/line capacity planning. Per BEST WFM §3.1.3.

9.1 Erlang C Calculator — Agent Requirement Estimator

Use: Estimate agents required to meet a service level target for queued, real-time transactions (phone, chat). Appropriate when blocked calls are queued and callers wait for the next available agent.

ERLANG C CALCULATOR

INPUTS

Calls per interval: 150
AHT (seconds): 300
Interval length (min): 30
Service Level target: 80%
Service Time target (s): 20

OUTPUTS

Agents Required: 22
Traffic Intensity (A): 12.5 Erlangs
Occupancy: 78.4% OK
Prob. of Waiting P(W>0): 18.2%
Avg Speed of Answer: 12.3s OK
Min agents (no SL target): 13
Extra agents for SL target: 9

FORMULA:

Traffic Intensity:
A = (calls/hr × AHT) / 3600

Service Level:
SL = 1 - P(W>0) × e^{-(N-A)} × t/AHT

Where:
N = number of agents
A = traffic intensity (Erlangs)
t = service time target (sec)

SENSITIVITY TABLE:

Agents	SL %	Occ %	ASA
19	61.2%	90.7%	48s
20	71.4%	86.1%	28s
21	79.2%	82.0%	17s
22	85.3%	78.4%	12s ✓
23	90.1%	74.9%	8s
24	93.7%	71.7%	6s

[Calculate] [Push to Capacity Plan] [Push to Forecast as Avail Rate]

[Save Scenario] [Export]

9.2 Erlang B Calculator — Trunk Line Capacity Estimator

Use: Estimate number of trunks or lines required to limit call blocking probability. Appropriate when blocked calls are lost rather than queued.

ERLANG B CALCULATOR

INPUTS

Busy Hour Traffic (Erlangs): 28
Target Blocking %: 1.0%

OUTPUTS

Trunks Required: 35
Actual Blocking at 35: 0.82% OK
Traffic per Trunk: 0.80 Erl
Utilisation: 80.0%

FORMULA:

P_B = (A^N / N!) / SUM(k=0 to N: A^k / k!)

Where:
A = offered traffic (Erlangs)
N = number of trunks/lines
P_B = blocking probability

SENSITIVITY TABLE:

Trunks	Blocking%	Util %
30	5.82%	93.3%
32	3.01%	87.5%
34	1.34%	82.4%
35	0.82% ✓	80.0% ✓
36	0.49%	77.8%
38	0.16%	73.7%

[Calculate] [Save Scenario] [Send to IT / Routing Manager] [Export]

9.3 When to Use Erlang C vs Erlang B

Calculator	Use Case	Blocked Calls	Output
Erlang C	Contact centre staffing — callers wait in queue for next available agent	Queued (callers wait)	Agents required to meet SL target
Erlang B	Trunk/line provisioning — callers who cannot connect are lost	Lost (callers disconnect)	Trunks required to meet blocking % target

MODULE 10 — Reports Centre

All six BEST WFM standard reports are built into the platform per §4.1. Each KPI has a defined target; variances are measured and analysed automatically.

10.1 Standard Reports Suite

#	Report Name	Frequency	Source Modules	Key Metrics
1	Capacity Planning Dashboard	Weekly	Capacity Planner	Requirement coverage rate; FTE gap; company resources; 6-month rolling view; stage comparison (estimate vs locked vs actuals); GM estimate per stage
2	Short-Term Plan	Weekly	Capacity + Scheduling + ACD	Required HC vs Scheduled HC vs Actual HC by interval and day; all contributing assumptions; gap in % and absolute — published vs locked vs actual
3	Schedules Convenience	Weekly	Schedule Builder	Preference fulfillment rate; availability compliance; fairness (morning/evening/night/weekend split per CE); vacation days accrued vs slots remaining; swap approval rate; weekly change rate; avg shift variance on consecutive days
4	RTM Plan vs Actual	Daily — near-time + EOD	RTM Console + ACD + Schedule Builder	All forecast/capacity/schedule assumptions vs actuals by interval and cumulative day; SL; ABA; AHT; adherence; outages; action tracker log; EOD projection updated throughout day
5	WFM Gaps Monitoring	Weekly	All WFM modules + Finance	Full hourly breakdown model at all stages (pricing → commitment → re-forecast → cap plan → scheduling → actuals); GM variance; key compliance KPIs; Bill-to-Pay metric
6	Adherence Dashboard	Daily	ACD + Scheduling Tool	Initial vs adjusted infractions (hours, %, event count); infraction by reason (late arrival, early departure, missing intra-shift); adjustment reason (sickness, technical); per Supervisor/OM/OAM; on-time adjustment rate; financial impact of infractions

10.2 WFM Gaps Monitoring — Stage KPIs

KPI	Formula
Capacity Planning Req Coverage Rate	Production Hrs (cap plan capacity) ÷ Production Hrs (cap plan requirement)
Schedules Compliance to Cap Plan	Scheduled Hrs Net (scheduling) ÷ Scheduled Hrs Net (cap plan capacity)
Cap Plan Req Present Hrs Completion	Present Hrs excl. NHT (actuals) ÷ Present Hrs excl. NHT (cap plan requirement)
Cap Plan Capacity Production Hrs Compl	Production Hrs (actuals) ÷ Production Hrs (cap plan capacity)
Schedules Production Hrs Completion	Production Hrs (actuals) ÷ Production Hrs (scheduling expectations)
Pricing Productivity Variance	(Present Hrs excl. NHT recalculated on pricing assumptions – Actual Present Hrs) ÷ Present Hrs excl. NHT on pricing assumptions

MODULE 11 — Governance and Audit Layer

Per BEST WFM §5 — the audit grid covers 11 main items and 50 sub-items. The platform tracks self-evaluation scores, corrective action plans, meetings cadence compliance, and provides a full immutable audit trail.

11.1 BEST WFM Audit Grid Tracker

#	Audit Area	Score	Target	Status	Corrective Action
1	Forecasting Process	90%	≥80%	✓ OK	—
2	Capacity Planning Process	88%	≥80%	✓ OK	—
3	Scheduling Process	82%	≥80%	✓ OK	—
4	Real-Time Management	85%	≥80%	✓ OK	—
5	Routing & Skills Management	80%	≥80%	✓ OK	—
6	Vacation Planning	76%	≥80%	⚠ Below	Global tool deployment pending — interim manual process gap to be closed by Q3
7	GM Estimation	83%	≥80%	✓ OK	
8	Reports and Analysis	88%	≥80%	✓ OK	—
9	WFM Team Structure	85%	≥80%	✓ OK	—
10	Meetings Cadence	79%	≥80%	⚠ Below	RTM routine dropped to 3x/week — return to daily cadence immediately
11	Governance and Compliance	86%	≥80%	✓ OK	—
	OVERALL SCORE	84.2%	≥80%	✓ OK	2 areas below target — corrective plans active

11.2 Meetings Cadence Tracker

Per BEST WFM §4.3 — all required meetings must be tracked for audit compliance.

Meeting	Cadence	Mandatory Participants	Last Held	Status
Volume / Hours Forecast Review	Monthly	WFM Lead, WFM Analyst, Operations Lead, Account Manager	01-May-2026	✓ On track
Capacity Planning Review	Weekly	WFM Lead, WFM Analyst, Operations Lead, Recruitment Lead, Training Lead, Account Manager, Finance Controller	20-May-2026	✓ On track
Schedules Review	Weekly	WFM Scheduling Analyst, WFM RTA, WFM Lead, Operations Lead	20-May-2026	✓ On track
RTM Routine	Daily	WFM RTA, WFM Scheduling Analyst, WFM Lead, Operations Lead	22-May-2026	⚠ Missed x2 — at risk
Financial Projections Review	Weekly	WFM Lead, Finance Controller, Operations Lead	19-May-2026	✓ On track
Monthly Management Meeting (M3)	Monthly	All department leads	30-Apr-2026	✓ On track

11.3 Full Audit Trail Log

AUDIT TRAIL — All WFM Actions			
Filter: [Module ▼] [User ▼] [Date Range ▼] [Action Type ▼] [Search]			
Timestamp	User	Action	Details
23-May 09:10	J.Murphy	Forecast locked — June 2026	[View]
23-May 09:22	S.Ryan	Schedule published — W24	[View]
23-May 09:45	System	AI alert: W26 coverage 93.2%	[View]
23-May 10:05	J.Murphy	Hire requisition sent (6 FTE)	[View]
23-May 10:22	M.Kelly	Skill change: Chat to Phone (x3)	[View]
23-May 10:35	M.Kelly	3 breaks postponed — SL amber	[View]
23-May 11:00	System	GM estimate pushed to Finance	[View]
23-May 11:15	J.Murphy	Cap plan sign-off requested	[View]
All actions are immutable once logged. Edits create new audit entries.			
[Export Audit Log] [TOPS/BEST Certification Link]			

PART 3 — CROSS-DEPARTMENT INTEGRATION HUB

12.1 WFM ↔ Operations Agent — Full Data Exchange

Direction	Data Item	From/To Module	Frequency
► WFM TO OPS	Published CE schedules per interval per skill	Schedule Builder	On publish/lock
► WFM TO OPS	Supervisor schedules aligned to CE coverage	Schedule Builder	On publish/lock
► WFM TO OPS	Interval over/under staffing view	Schedule Builder	Weekly + on change
► WFM TO OPS	Capacity plan 6-month rolling view	Capacity Planner	Weekly after sign-off
► WFM TO OPS	SL/ABA action triggers and RTM alerts	RTM Console	Real-time 30 seconds
► WFM TO OPS	Outage alerts with affected CE list and revenue impact	RTM Console	On outage detection
► WFM TO OPS	AHT reduction targets from GM analysis	GM Estimator	Monthly
► WFM TO OPS	In-office shrinkage optimisation recommendations	GM Estimator	Monthly
► WFM TO OPS	NHT schedule: training room, trainer, batch assignments	Schedule Builder	Per NHT batch
◄ OPS TO WFM	Live ACD data: SL, ABA, calls in queue, ASA, agent states	RTM Console	Every 15-30 seconds
◄ OPS TO WFM	Actual AHT by interval and queue	Forecast + RTM	Real-time
◄ OPS TO WFM	Agent login/logout actuals for adherence	RTM Console	Real-time
◄ OPS TO WFM	Actual volume by queue	Forecast Studio	Daily
◄ OPS TO WFM	CE skill certification updates	Routing Manager	On certification
◄ OPS TO WFM	FTE movements: transfers in/out, promotions	Capacity Planner	Weekly
◄ OPS TO WFM	Confirmed leavers per week	Capacity Planner	As confirmed
◄ OPS TO WFM	Client calendar events: launches, campaigns, holidays	Forecast Studio	Monthly
◄ OPS TO WFM	Client escalations requiring RTM response	RTM Console	As raised

12.2 WFM ↔ Finance Agent — Full Data Exchange

Direction	Data Item	From/To Module	Frequency
► WFM TO FIN	Weekly GM estimate	GM Estimator	Weekly
► WFM TO FIN	Stage-by-stage GM variance analysis	GM Estimator	Weekly
► WFM TO FIN	Scenario simulation outputs for pricing team	GM Estimator	On request
► WFM TO FIN	Scheduled hours gross per week for payroll cost estimate	Schedule Builder	On schedule lock
► WFM TO FIN	Premium shift hours: evenings, nights, weekends	Schedule Builder	On schedule lock
► WFM TO FIN	OT hours collected per day	RTM Console	Daily
► WFM TO FIN	VTO hours approved per day	RTM Console	Daily
► WFM TO FIN	Outage hours lost per incident	RTM Console	On outage close
► WFM TO FIN	Company resource cost projections: seats, IT equipment	Capacity Planner	Weekly
► WFM TO FIN	Unused leave liability: accrued days x daily CE cost	Leave Planner	Monthly
► WFM TO FIN	Leaver cost estimates per FTE	Capacity Planner	As leavers confirmed
► WFM TO FIN	Quarterly re-forecast volume inputs	Forecast Studio	Quarterly
► WFM TO FIN	Yearly budget volume assumptions	Forecast Studio	Annually Sep/Oct
◄ FIN TO WFM	Direct Cost / PPH updated from actual financial results	GM Estimator	Monthly
◄ FIN TO WFM	Price per unit from billing model / contract	GM Estimator	On contract change
◄ FIN TO WFM	SG&A cost allocations	GM Estimator	Monthly
◄ FIN TO WFM	Bonus and malus results per contract period	GM Estimator	Per contract period
◄ FIN TO WFM	AHT cap confirmation from contract	GM Estimator	On contract change
◄ FIN TO WFM	Financial projection targets for weekly review meeting	GM Estimator	Weekly

12.3 WFM ↔ Recruitment Agent — Full Data Exchange

Direction	Data Item	From/To Module	Frequency
► WFM TO REC	Hire requisitions: FTE count, required start date, skill requirements, location type	Capacity Planner	On plan approval or coverage alert
► WFM TO REC	Shift pattern expectations for job adverts: % morning/evening/weekend	Schedule Builder	Per requisition
► WFM TO REC	Training room bookings: dates, room number, max class size	Capacity Planner	Per NHT batch
► WFM TO REC	Trainer schedule requirements per NHT batch	Schedule Builder	Per NHT batch
► WFM TO REC	NHT duration and nesting period per project setup	Capacity Planner	On project setup / change
► WFM TO REC	Pass rate assumptions per training cohort	Capacity Planner	Per NHT review
► WFM TO REC	Cost of leavers per FTE: recruitment + NHT cost estimate	GM Estimator	Monthly
► WFM TO REC	Optimal hire timing to avoid dual-cost overlap periods	GM Estimator	On plan approval
► WFM TO REC	Multi-skill requirements when skill gaps detected in routing	Routing Manager	On skill gap detection
◄ REC TO WFM	Confirmed hire start dates per requisition	Capacity Planner	As confirmed
◄ REC TO WFM	Confirmed NHT batch sizes per cohort	Capacity Planner	Per batch confirmation
◄ REC TO WFM	Training leavers: drop-outs during NHT period	Capacity Planner	During NHT
◄ REC TO WFM	Actual pass rate per completed NHT batch	Capacity Planner	On NHT completion
◄ REC TO WFM	New hire profiles: contract type, hours, skills, location	Schedule Builder	On hire confirmed
◄ REC TO WFM	Recruitment pipeline status: applicants, interviews, offers, start date confirmed	Capacity Planner	Weekly
◄ REC TO WFM	Recruitment timelines: average days to hire per role	Capacity Planner	On setup / change

12.4 WFM ↔ Enterprise Intelligence Agent — Data Exchange

Direction	Data Item	Frequency
► WFM TO EI	Requirement coverage rate	Weekly — cross-pillar executive dashboard
► WFM TO EI	Scheduling efficiency %	Weekly — cross-pillar executive dashboard
► WFM TO EI	Adherence rate	Daily — cross-pillar executive dashboard
► WFM TO EI	Forecast accuracy %	Monthly — trend reporting
► WFM TO EI	GM estimate vs pricing	Weekly — executive reporting
► WFM TO EI	Attrition rate	Monthly — workforce health indicator
► WFM TO EI	BEST WFM audit grid scores	Quarterly — governance reporting
◄ EI TO WFM	Cross-pillar alerts: e.g. OPS SL at risk + WFM coverage gap simultaneously	Real-time as raised
◄ EI TO WFM	Executive dashboard KPI targets for next quarter	Quarterly — target setting cycle
◄ EI TO WFM	Benchmarks vs other projects on same platform	Monthly — performance context

PART 4 — WFM TEAM STRUCTURE

13.1 WFM Team Sizing Calculator

Per BEST WFM §4.2.2 — the platform includes a built-in WFM team ratio calculator. Ratios are based on active CE headcount (not FTEs). Green = standard target.

Role	TP Ratio	Example: 520 CE HC Required	Direct Reports
WFM Analyst (Planning)	1:250	2.1	—
WFM Real-Time Analyst	1:120	4.3	—
WFM Scheduling Analyst	1:81	6.4	—
WFM Software Administrator	Included	—	—
TOTAL ANALYSTS	—	12.8	—
WFM Team Leader / Asst Manager	1:377	1.4	4-5
WFM Manager	1:1,509	0.3	4-5
WFM Director / VP	1:6,037	0.1	4
TOTAL MANAGEMENT	1:287	1.8	—
TOTAL WFM TEAM	1:63	14.6	—

13.2 WFM Team Skills and Competencies

Per BEST WFM §4.2.3.

Skill / Competency	Pre-Requisite	Can Be Trained On-Job
Excel skills	✓	—
English language skills	✓	—
Contact Centre experience	✓	—
WFM experience	—	✓
WFM processes knowledge	—	✓
WFM system knowledge	—	✓
WFM management skills	—	✓

13.3 Game Plan — Daily Task Assignment Tracker

Per BEST WFM §4.2.4 — the Game Plan schedules daily, weekly, and monthly tasks with defined owners, estimated time, and deadlines.

Task	Owner	Freq	Est. Time	Deadline	Status
Update volume forecast	Planning Analyst	Weekly	45 min	Mon AM	✓ Done
AHT learning curve update	Planning Analyst	Weekly	20 min	Mon AM	✓ Done
Forecast accuracy analysis	Planning Analyst	Monthly	60 min	1st Mon	○ Pending
Update capacity plan file	Planning Analyst	Weekly	90 min	Tue AM	✓ Done
Capacity planning meeting	WFM Manager	Weekly	60 min	Tue PM	✓ Done
Send hiring requisitions	WFM Manager	As needed	15 min	Post-mtg	○ Pending
Generate schedules	Scheduling Analyst	Weekly	2 hrs	Wed AM	✓ Done
Schedules review meeting	WFM Manager	Weekly	45 min	Wed PM	✓ Done
Publish schedules	Scheduling Analyst	Weekly	15 min	Thu AM	✓ Done
Lock schedules	Scheduling Analyst	Weekly	10 min	Thu AM	✓ Done
RTM routine meeting	RTA	Daily	15 min	08:00	✓ Done
EOD RTM report	RTA	Daily	30 min	End shift	○ Pending

PART 5 — WFM AI AGENT CAPABILITIES

Full capability register of every AI-powered feature in the WFM pillar, mapped to the BEST WFM document sections they operationalise.

AI Capability	Module	BEST WFM Ref	Classification
Historical pattern detection in volumes	Forecast Studio	§3.1.3	Standard
Seasonality and trend modelling	Forecast Studio	§3.1.3	Standard
Anomaly detection in volume data	Forecast Studio	§3.1.3	Recommended
Event impact quantification	Forecast Studio	§3.1.3	Recommended
Forecast accuracy tracking and benchmarking	Forecast Studio	§3.1.1	Standard
Internal vs client forecast challenge engine	Forecast Studio	§3.1.2	Recommended
AHT weighted average by seniority matrix	Forecast Studio	§3.1.3	Standard
Erlang C availability rate calculator	Erlang Suite	§3.1.3	Standard
Erlang B trunk/line capacity calculator	Erlang Suite	§3.1.3	Standard
Optimal hire timing recommender	Capacity Planner	§3.2.3	Recommended
Leaver pattern prediction engine	Capacity Planner	§3.1.3	Future
Recruitment strategy optimiser	Capacity Planner	§3.2.3	Recommended
Coverage rate threshold alert	Capacity Planner	§3.2.3	Standard
Multi-skill scenario simulator	Capacity Planner	§3.2.3	Recommended
Company resource demand forecasting	Capacity Planner	§3.2.1	Recommended
Optimal schedule auto-generation	Schedule Builder	§3.3.3	Standard
Preference fulfillment optimiser	Schedule Builder	§3.3.1	Standard
Legal compliance checker per interval	Schedule Builder	§3.3.1	Standard
Shift swap auto-validator	Schedule Builder	§3.3.3	Recommended
Lunch distribution optimiser	Schedule Builder	§3.3.3	Recommended
HR database auto-sync on CE join and leave	Schedule Builder	§3.3.1	Recommended
Transport route optimiser	Schedule Builder	§3.3.3	Future
Login/logout schedule validator	Schedule Builder	§3.3.3	Recommended
Real-time SL projection to EOD	RTM Console	§3.4.1	Standard
Action matrix auto-trigger	RTM Console	§3.4.2	Standard
CE adherence alerts: extended break, long ACW	RTM Console	§3.4.2	Standard
In-office shrinkage dynamic re-ordering	RTM Console	§3.4.2	Recommended
OT and VTO opportunity identifier	RTM Console	§3.4.2	Recommended
Outage auto-detection and tracker update	RTM Console	§3.4.2	Recommended
Performance alert: AHT, ACW, adherence	RTM Console	§3.4.2	Standard
Absenteeism real-time update to scheduling tool	RTM Console	§3.4.2	Recommended
Skill auto-adjustment based on SL and queue depth	Routing Manager	§3.5.1	Recommended
Orphan queue detection: no skill linked	Routing Manager	§3.5.2	Standard
Multi-skill availability rate optimiser	Routing Manager	§3.5.1	Recommended
Real-time slot approval engine	Leave Planner	§3.6.2	Future
Unused leave utilisation alert	Leave Planner	§3.6.1	Recommended
Conflict detection: same-skill CEs same period	Leave Planner	§3.6.2	Recommended
GM variance driver identification	GM Estimator	§3.7.2	Standard
What-if scenario simulator	GM Estimator	§3.7.2	Standard
AHT financial impact calculator	GM Estimator	§3.7.2	Standard
GM optimisation recommendation engine	GM Estimator	§3.7.2	Recommended
Cross-stage assumption comparison engine	GM Estimator	§3.7.1	Standard

PART 6 — APPENDIX

A. Complete Terminology Glossary

Per BEST WFM §2.1 — all official Teleperformance WFM terms.

Term	Definition	Platform Location
Offered Volume	Total incoming transactions including abandoned	Forecast Studio, RTM
Abandoned Transactions	Calls ended before CE or system interaction	RTM Console, Reports
Handled Volume	Offered volume minus abandoned transactions	All modules
Single AHT	Avg handling time of one transaction: talk time + hold time + ACW (auto and manual)	Forecast Studio
Concurrency Rate	Rate at which transactions are handled simultaneously — applicable to chat	Forecast Studio
AHT	Single AHT divided by concurrency rate	All modules
Transaction Hours	Handled volume multiplied by AHT	Hourly Breakdown Engine
Available Hours	Time CE is ready but not handling transactions	Hourly Breakdown Engine
Production Hours	Transaction hours plus available hours	All modules
In-Office Shrinkage Hours	Present but not in production: breaks, meetings, training, technical issues	Schedule Builder, RTM
Present Hours (excl. NHT)	Production hours plus in-office shrinkage hours	All modules
Unplanned Out-Office Shrinkage	Time missed not known before schedule published: sickness, no show, lateness	Capacity Planner, RTM
Scheduled Hours Net	Present hours plus unplanned out-office shrinkage buffer	Schedule Builder
Planned Out-Office Shrinkage	Known absences before schedule published: approved vacation, planned medical leave	Leave Planner
Scheduled Hours Gross	Scheduled hours net plus planned out-office shrinkage	Schedule Builder
Occupancy	Transaction hours divided by production hours	RTM Console, Reports
Availability Rate	Available hours divided by production hours	Forecast Studio, RTM
Efficiency	Transaction hours divided by present hours excluding NHT	Reports Centre
Utilisation	Production hours divided by present hours excluding NHT	Reports Centre
FTE	Full-time equivalent — one employee working full-time paid hours only	All modules
Standardised TP FTE	Scheduled hours gross divided by 40 weekly / 173 monthly / 2080 yearly	Capacity Planner
PPH (Paid Production Hours)	Paid portion of present hours excluding NHT — also called Paid Present Hours	GM Estimator
Paid Hours	Paid portion of scheduled hours gross	GM Estimator, Finance
NHT	New Hire Training — initial training period for newly hired Customer Experts	Capacity Planner, Schedule Builder
Leavers	All CE movements resulting in FTE decrease on project — voluntary, involuntary, end of contract, promotion, transfer	Capacity Planner, Forecast
Attrition	Leavers requiring replacement divided by total CE headcount multiplied by 12 (annualised)	Dashboard, Reports
Requirement Coverage Rate	Capacity production hours divided by requirement production hours — target 100%	Capacity Planner, Dashboard
FCA	Forecast accuracy — actuals divided by forecasted volume	Forecast Studio, Reports
Direct Cost / PPH	Total direct costs divided by total present hours excluding NHT	GM Estimator
GM	Gross Margin — total net revenue minus direct costs	GM Estimator
Erlang C	Mathematical formula for agent requirement calculation with queued calls	Erlang Suite
Erlang B	Mathematical formula for trunk and line capacity with blocked lost calls	Erlang Suite
B&M	Brick and Mortar — 100% office-based working	Schedule Builder, Capacity Planner
Cloud Campus	100% remote working from home	Schedule Builder, Capacity Planner
Cloud Campus Hybrid	Mix of office and home working per defined schedule	Schedule Builder
VTO	Voluntary Time Off — CE voluntarily leaves shift early	RTM Console
OT	Overtime — CE works beyond scheduled hours	RTM Console
RTA	WFM Real-Time Analyst	RTM Console
SOW	Statement of Work — contractual assumptions document	GM Estimator
MSA	Master Service Agreement	GM Estimator
SL	Service Level — percentage of calls answered within target time	RTM Console, Reports
ABA	Abandonment Rate	RTM Console, Reports
ASA	Average Speed of Answer	RTM Console, Erlang Suite
ACW	After Call Work — post-call wrap time component of AHT	Forecast Studio, RTM
OEI	Operational Efficiency Improvement toolkit	GM Estimator, Reports
CE	Customer Expert — official Teleperformance name for agent or CSR	All modules
Supervisor	Leads and manages a team of Customer Experts	Schedule Builder, RTM
OAM	Operations Assistant Manager — manages Supervisors	Governance
SME	Subject Matter Expert	Schedule Builder
HOOPs	Hours of Operations	RTM Console, Schedule Builder
Bill to Pay (B2P)	Ratio of billed hours to paid hours	GM Estimator, Reports
Pricing Model	Full list of WFM assumptions used to calculate the agreed contractual price	GM Estimator
Multi-skilling	CE trained to handle multiple queue or channel types	Routing Manager
Blending	CE handles multiple transaction types without manual ACD skill change	Routing Manager
Nesting	Post-NHT period where new hires handle live contacts with supervisor support	Capacity Planner
LOB	Line of Business	All modules

B. In-Office Shrinkage Categories Reference

Per BEST WFM §2.2.4 — pre-built into Schedule Builder and RTM Console.

Category	Type	Definition
Break (Paid)	In-Office Shrinkage	Scheduled or unscheduled breaks paid by company
Break (Personal Time)	In-Office Shrinkage	Scheduled or unscheduled breaks not paid by company
Meeting	In-Office Shrinkage	Team meetings, briefings
Coaching	In-Office Shrinkage	Coaching sessions, feedback delivery, development plans
Production Training	In-Office Shrinkage	Upskill or refresh training conducted during production period
Technical Issue	In-Office Shrinkage	Downtime due to system or technical problems
Administrative Task	In-Office Shrinkage	Non-project related tasks
Lost Time	In-Office Shrinkage	Remaining time between present hours and all identified statuses above
Sickness	Unplanned Out-Office	Time off due to illness
No Call No Show	Unplanned Out-Office	Absent without any prior notice
Lateness / Early Leavers	Unplanned Out-Office	Arriving late or leaving before scheduled shift end
Lost Leaver Hours	Unplanned Out-Office	Hours lost due to leavers within the scheduled period
Unplanned Personal Leave	Unplanned Out-Office	Emergencies, medical appointments, legal obligations
Unplanned Vacation	Unplanned Out-Office	Vacation approved after schedules are published
Planned Vacation	Planned Out-Office	Vacation approved before schedules are published
Other Planned Time Off	Planned Out-Office	Planned unpaid leave, planned medical leave, other pre-approved absence

C. Billing Model Reference

Per BEST WFM §2.3 — the GM Estimator module supports all billing models.

Billing Model	Revenue Driver	Key WFM Assumptions Impacting Revenue	Key WFM Assumptions Impacting Costs
Per Transaction	Handled volume	AHT if capped, abandon rate	AHT, all shrinkage if paid
Per Transaction Hour	Transaction hours	AHT, concurrency, abandon rate	AHT, all shrinkage if paid
Per Production Hour	Production hours	AHT, availability rate, abandon rate	AHT, availability rate, all shrinkage if paid
Per Present Hour	Present hours	AHT, availability rate, in-office shrinkage	All items if paid
Per Employed FTE	FTE headcount	All shrinkage types, leavers	All items if paid
Per Sale	Number of sales	Volume, conversion rate	All cost items
Per Amount Collected	Amount collected	Volume, collection rate	All cost items
Per Workstation	Workstations occupied	Seat occupancy, location model	Facility costs
Per Project / Portfolio	Monthly fee	Contract terms	All direct costs

D. Document Approval and Sign-Off

Role	Name	Signature	Date
WFM Product Lead			
UX / Design Lead			
Engineering Lead			
Operations Sponsor			
Finance Sponsor			
Recruitment Sponsor
